

INDEX

1. Introduction	13
Author: Ana Isabel Morales	
2. TOX-OER to promote Open Science in the field of Toxicology	19
Authors: Stefano Girotti, Laura Mercolini, Michele Protti, Roberto Mandrioli	
2.1. Toxicology for all. A proposal of open online course: limits and opportunities	19
2.2. TOX-OER as a scientific and pedagogical joint between research and education	22
2.3. TOX-OER and the principle of “open” in Toxicology	25
2.4. In the name of free and open knowledge	28
Bibliography	31
3. MOOC Pedagogy	33
Authors: Luigi Guerra, Luca Ferrari	
3.1. Challenges in today’s education	33
3.2. The concept and philosophy of Open Educational Resources (OERs)	38
3.3. Basic requirements of a MOOC	40
3.4. Current and future trends	42
Bibliography	44
4. TOX-OER MOOC	47
Authors: Luigi Guerra, Luca Ferrari, Marco Nenzioni	
4.1. Introductory aspects	47
4.2. Learning objectives and outcomes	50
4.3. From the definition of contents and objectives to the construction of scripts	58
4.4. TOX-OER usage scenarios	63
Bibliography	68

5. MOODLE as a MOOC platform	69
Authors: Merja Mäkelä, Mirva Pilli-Sihvola, Matti Strengell, Marco Nenzioni	
5.1 Using basic Moodle properties	69
5.2 Usage as a collaborative working platform	73
Bibliography	74
6. TOX-OER content development	77
Authors: Merja Mäkelä, Mirva Pilli-Sihvola, Matti Strengell, Luca Ferrari	
6.1. Choosing feasible tools for implementation	77
6.2. Realizing scripts with resources and activities	79
6.3. Usage as a collaborative working platform - TOX-OER experiences	84
7. Visualization in a MOOC. The TOX-OER experience	87
Authors: Laura Corazza, Andrea Reggiani, Luca Ferrari, Marco Nenzioni, Merja Mäkelä	
7.1. Video development: introductory and theoretical aspects	87
7.2. Video development (basic kit)	90
7.3. The TOX-OER YouTube channel	101
7.4. Gamification ideas and prototypes	106
7.5. Animations	112
Bibliography	114
8. Teaching using a MOOC	117
Authors: Roberto Mandrioli, Merja Mäkelä	
8.1. Teacher experiences in the development of a pharmaceutical online course	117
8.2. Teacher experiences in the running of an environmental online course	120

9. Learning recognition	123
Authors: Fernando Remião, Merja Mäkelä	
9.1. TOX-OER scenario	123
9.2. Exams and automatic certificates	133
Bibliography	134
10. Quality control in a MOOC	135
Authors: Ana Isabel Morales, Moisés Pescador, Marta Prieto, Laura Vicente-Vicente	
10.1. Introduction	135
10.2. Phases of quality control	136
10.3. Aspects to assess	138
10.4. Quality indicators	138
10.5. Quality control experiences: TOX-OER	143
Bibliography	149

INDICE

1. Introducción	159
Autor: Ana Isabel Morales	
2. TOX-OER, un proyecto destinado a fomentar la ciencia abierta en el ámbito de la toxicología	165
Autores: Stefano Girotti, Laura Mercolini, Michele Protti, Roberto Mandrioli	
2.1. Toxicología para todos. Una propuesta de curso abierto <i>online</i> : límites y oportunidades	165
2.2. TOX-OER como vínculo científico y pedagógico entre la investigación y la educación	168
2.3. TOX-OER y el principio de “abierto” en Toxicología	172
2.4. En nombre del aprendizaje gratuito y en abierto	175
Bibliografía	178
3. La pedagogía en un MOOC	179
Autores: Luigi Guerra, Luca Ferrari	
3.1. Retos actuales en la educación	179
3.2. El concepto y la filosofía de los Recursos Educativos Abiertos (REAs)	185
3.3. Requisitos básicos de un MOOC	187
3.4. Tendencias actuales y futuras	190
Bibliografía	192
4. El MOOC TOX-OER	195
Autores: Luigi Guerra, Luca Ferrari, Marco Nenzioni	
4.1. Cuestiones introductorias	195
4.2. Objetivos de aprendizaje y resultados	198
4.3. De la definición de contenidos y objetivos a la elaboración de guiones	206
4.4. Escenarios de uso de TOX-OER	212
Bibliografía	218

5. MOODLE como plataforma para un MOOC	219
Autores: Merja Mäkelä, Mirva Pilli-Sihvola, Matti Strengell, Marco Nenzioni	
5.1. Empleo de las propiedades básicas de Moodle	219
5.2. Uso como plataforma de trabajo colaborativo	224
Bibliografía	225
6. Desarrollo de contenidos para TOX-OER	227
Autores: Merja Mäkelä, Mirva Pilli-Sihvola, Matti Strengell, Luca Ferrari	
6.1. Selección de herramientas viables para la implementación	227
6.2. Creación de guiones con recursos y actividades	229
6.3. Uso como plataforma de trabajo colaborativo – experiencias con TOX-OER	236
7. La visualización en un MOOC. La experiencia TOX-OER	237
Autores: Laura Corazza, Andrea Reggiani, Luca Ferrari, Marco Nenzioni, Merja Mäkelä	
7.1. Creación de vídeo: aspectos introductorios y teóricos	237
7.2. Creación de vídeo (paquete básico)	241
7.3. El canal de YouTube de TOX-OER	252
7.4. Ideas y prototipos de Gamificación	258
7.5. Animaciones	264
Bibliografía	266
8. Enseñar a través de un MOOC	269
Autores: Roberto Mandrioli, Merja Mäkelä	
8.1. Experiencias docentes en el desarrollo de un curso online sobre farmacología	269
8.2. Experiencias docentes en el desarrollo de un curso en línea sobre el medio ambiente	272

9. Reconocimiento del aprendizaje	275
Autores: Fernando Remião, Merja Mäkelä	
9.1. El caso de TOX-OER	275
9.2. Exámenes y certificados automáticos	286
Bibliografía	287
10. Control de calidad de un MOOC	289
Autores: Ana Isabel Morales, Moisés Pescador, Marta Prieto, Laura Vicente-Vicente	
10.1. Introducción	289
10.2. Fases del control de calidad	290
10.3. Aspectos a valorar	292
10.4. Indicadores de calidad	293
10.5. Experiencias en control de calidad: TOX-OER	297
Bibliografía	304

Autores

Ana Isabel Morales Martín, PhD in Pharmacy, is Professor at the University of Salamanca and head of the Toxicology Unit of the University of Salamanca. She is a member of the “Translational Research on Renal and Cardiovascular Diseases Group”, and of a “Unit of Consolidated Research”, both recognised as “Groups of Excellence”. In recent years, her research has focused mainly on the improvement of the clinical management and prognosis of patients with acute kidney injury due to nephrotoxicity induced by drugs or environmental pollutants. Her research has been framed within research projects obtained under competitive calls, having been the principal investigator of most of them. Her research outcomes have given rise to scientific publications in high impact journals. In the teaching sphere, she has directed numerous “Teaching Innovation Projects”, and has been the coordinator of the “Learning Toxicology through Open Educational Resources” European project, funded by the Erasmus+ programme and also the reason for this book.

PhD Marta Prieto Vicente graduated in Pharmacy in 1999. In 2000, she obtained a Young Researcher Training scholarship, and in 2005 she defended her doctoral dissertation. In 2007 she obtained the position of Assistant Professor of Toxicology and has been an Associate Professor since 2013. Most of her work is in the field of renal pathophysiology and nephrotoxicity, having participated in many research projects that have afforded publications and communications at conferences. One of her current lines of research focuses on nephrotoxicity induced by calcineurin inhibitor immunosuppressive agents, for which she has been granted three research projects as principal investigator. In the teaching sphere, she has taken part in several innovation projects, being the principal investigator in two of them. Also noteworthy is her participation in the TOX-OER (Learning Toxicology through Open Educational Resources) project, funded by the Erasmus + programme.

Moisés Pescador Garriel, PhD in Biology by the University of Salamanca, works as Associate Professor in the area of toxicology of the Department of Physiology and Pharmacology, pertaining to the Faculty of Agricultural and Environmental Sciences. His teaching activity is framed in the Undergraduate Degree in Environmental Sciences and the Master's Degrees in Environmental Sciences, Agronomical Engineering and Preservation of Biodiversity at the University of Salamanca. As a researcher, he is working on several of the Toxicology Group's research projects aimed at identifying early biomarkers of acute kidney injury and predisposition to it, as well as on studies in the areas of ecotoxicology and management, environmental planning and development of mitigation measures for wildlife, especially birds, mammals and fish.

PhD Laura Vicente Vicente graduated in Pharmacy in 2006 and obtained her PhD in December 2011, winning the “Extraordinary Doctorate Award” delivered by the University of Salamanca. She has been teaching Toxicology as Assistant Professor at the University of Salamanca since 2011. Her main line of research is the study of kidney injury associated with toxicants (drugs, environmental pollutants...) and the search for strategies to prevent such damage. She has taken part in many research projects in the biohealth area, obtained under competitive calls, being the principal investigator of some of them. She has also participated in and directed projects in the field of teaching. Her research outcomes have been disseminated through publications in high impact journals and communications at conferences. Also noteworthy is her participation in the TOX-OER (Learning Toxicology through Open Educational Resources) European project, funded by the Erasmus + programme.

Fernando Manuel Gomes Remião is the current Pro-Rector for Educational Innovation and Sport, University of Porto (U.Porto) and Head of the U.Porto Unit for the Improvement of Teaching and Learning. Furthermore, he is Associate Professor with aggregation and member of the Scientific Council of the Faculty of Pharmacy of U.Porto (FFUP) and Senior Researcher in the Toxicology Group of the Applied Molecular Biosciences (UCIBIO, REQUIMTE) Research Unit. He graduated in Pharmaceutical Sciences by FFUP in 1993 where he obtained his PhD in Toxicology in 2002, after a brief period of research in the Department of Molecular Pharmacology and Toxicology, Faculty of Pharmacy, University of Southern California (USA). Fernando Remião is Associated Editor of the Scientific Journal Toxicology and Applied Pharmacology, being author/co-author of more than 100 papers published in international journals, and (co)supervised, with success, 6 PhD students and 7 MSc students. More curriculum information in ORCID: 0000-0003-1382-5119

Stefano Girotti is professor of Analytical Chemistry at University of Bologna and was in Scientific Committees of National and International Symposium, took part in several stages and collaborative works abroad. He was supervisor for research and training projects for Schools and Companies. He is director of the Master's Degree in "Chemical and Chemical-Toxicological Forensic Analyses" of University of Bologna. Scientific Interests: Analytical chemistry, in particular food chemistry, clinical analytical chemistry and environmental chemistry, bioluminescence, chemiluminescence, flow biosensors, environmental biomarkers (honeybees), pesticide analysis, toxicological analytical bioassays, immunology and immunological assays, DNA probes and "in situ" hybridisation. He coordinated or participated to several Italian and International projects. Therefore, he has experience in the management and coordination of several Research Units. He published more than 220 papers including reviews and monographs, book chapters, scientific articles published in international and national journals. He was awarded by the Honoris Causa title on Analytical Chemistry, on behalf of the Ovidius University, Constanta, Romania.

Laura Mercolini is Assistant Professor in Medicinal Chemistry and Head of the Pharmaco-Toxicological Analysis Laboratory Group (PTA Lab) at the Department of Pharmacy and Biotechnology (FaBIT) of the University of Bologna. She has a Master's degree in Medicinal Chemistry and Technologies and a Ph.D. in Pharmaceutical Sciences. Her studies are devoted to the development of innovative strategies for the analysis of doping agents, drugs of abuse and CNS drugs, combining cutting-edge HPLC and CE methodologies with miniaturised sampling and pre-treatment procedures. She is author of around 70 scientific papers in high-ranked journals and inventor of a national patent. She has delivered around 200 talks and seminars at national and international congresses, including plenary and keynote lectures. She is part of the scientific committee and teachers board of the professional post-lauream Master in "Forensic Chemical and Chemical-Toxicological Analysis", member of the Editorial Board of Journal of Pharmaceutical and Biomedical Analysis and Principal Investigator of national and international funded research projects.

Michele Protti is Post-Doc Research Fellow at the Pharmaco-Toxicological Analysis Laboratory (PTALab, FaBiT Department) of the University of Bologna. He got his Master's Degree in Pharmaceutical Chemistry and Technology and then completed his Ph.D. in Chemistry about novel hyphenated approaches for the determination of bioactive compounds in complex matrices. Dr. Protti is spending also research periods abroad, focusing his activity on the development of innovative advanced methods for the analysis of psychoactive compounds (doping agents, drugs of abuse, CNS drugs) in biological and non-biological samples, with emphasis on advanced microsampling and miniaturised pretreatment techniques. He is being involved as co-applicant and participant in national and international funded research projects in collaboration with the World Anti-Doping Agency (WADA), the Italian Ministry of Health, the Erasmus+ European Strategic Partnership, Police Forces and analytical companies. His research is embodied in more than 20 peer-reviewed publications and more than 70 contributions (oral communications and poster presentations) at national and international conferences and workshops.

Roberto Mandrioli is Associate Professor of Medicinal Chemistry at the Alma Mater Studiorum – University of Bologna, Rimini Campus. He obtained a Master’s Degree (cum laude) in Pharmaceutical Chemistry and Technology in 1995, then a Specialization Degree (cum laude) in Toxicology in 1998. His teaching activity takes place at the University of Bologna in the Master’s Degree in “Pharmacy”; he is also a founding member of, and a teacher in, the Post-graduate Master (EQF Level 8) in “Forensic Chemical and Chemical-Toxicological Analysis”. His main research topics include the development and validation of innovative analytical methods and novel sampling techniques for the determination of drugs, substances of abuse, endogenous and exogenous active compounds and natural compounds in different matrices, such as biological fluids, plant materials, formulations, food supplements. He is the author of 100 papers published in international impacted journals and more than 160 symposium communications.

Simone Mangini: Born in 1973, he graduated in industrial chemistry at the University of Bologna. He is a registered Italian and European patent attorney and he is qualified to act before the Community Design Office. He is also a member of the Italian Chemical Society. After having completed a period of research at the University of Bologna in the field of organic chemistry, leading to the publication of several articles in prestigious national and international scientific journals, and after a work experience as Commissioned Officer of the Engineer Corps, he qualified as an Italian Chartered Chemist. His scientific and academic background includes a Certificate in Chemistry from the University of Sussex and a Certificate in Intellectual Property and a M.Sc. in Management of Intellectual Property from the University of London (Queen Mary College). He joined the Studio Torta in 2000 and became an associate in January 2005, he mainly deals with chemical, pharmaceutical and biotechnological inventions.

Luigi Guerra is Head of the Department of Education Studies “G.M. Bertin” and Full Professor in Didactics and Special Pedagogy, University of Bologna. Scientific director of national and international researches and international cooperation projects, his research fields concern: the educational potential of MOOCs in higher education; eLearning environments and Open Educational Resources; didactic innovation mediated by ICT; policies and practices to support inclusive education in the State of El Salvador.

Luca Ferrari is Research Fellow at the Department of Education Studies of University of Bologna. His research project regards the “MOOCs in Higher Education: between tradition and innovation”. Since 2006 he takes active part in different EU funded projects in the field of “ICT and pedagogical innovation”. From 2009 to 2012 he has participated as “junior researcher” in the Ministerial project “Learning4all”. Consultant and trainer within the international cooperation projects “Supporting the promotion and development of the inclusive school in El Salvador” (2014) and “Strengthening full time inclusive school in El Salvador” (2016).

Marco Nenzioni is PhD student in Pedagogical Sciences, Alma Mater Studiorum – University of Bologna. Main research fields: the field of instructional design applied to education and technology field, with particular focus on inclusion issue. In the last two years I've worked as eLearning designer within private organization that operates in the field of training and professional development.

Andrea Reggiani. Since 2013 has been the representative of eLearning Laboratory (LAB-EL) for the promotion, design and delivery of services to support the research on distance learning within the Integrated Laboratory System (Small), Department of Education Studies, University of Bologna. He worked in the eLearning sector within the University of Bologna by coordinating several projects in collaboration with the industrial partners such as: Sinform, CSP, Think3, Microsoft, Giunti Interactive Labs. He has joined in several projects with public partners, foundations and private companies to implement eLearning systems and services. Since 1997 he has been involved in the design and development of prototypes to sustain the online collaborative learning in higher education.

Laura Corazza, PhD in Pedagogy. Her thesis was entitled “Democratic Education and Knowledge Society”. She actually runs the Laboratories at the Department of Education Studies, the University of Bologna. Her work is deals with media education, eLearning, and video research in education.

Merja Mäkelä. After her education at Tampere University of Technology in Finland, Ms. Merja Mäkelä was working for industrial companies in Germany and Finland, before becoming a principal lecturer of automation technology at South-Eastern Finland University of Applied Sciences. Her main responsibilities have been including teaching and thesis supervision activities in the engineer education of automation and energy technology, and development and research projects. Her main teaching subjects cover process control systems, and modelling and simulation of process systems. From the very beginning Ms. Mäkelä has been developing curricula in automation and energy technology degree programmes. Her pedagogical activities include the commissioning of distance-learning programmes. She has been successfully developing collaboration activities in ELearning with some domestic and international universities. Ms. Mäkelä's latest research and development activities include the role of automation in energy efficiency and the visualization of ELearning contents for engineer education, in Toxicology through Open Educational Resources TOXOER. Ms. Mäkelä has a good command of Finnish, English and German languages, and she has over 25 domestic and international publications on technical and pedagogical issues.
